

SOCCERGROUND MINI-PITCH · INDOOR

Professional soccer, **any season.**

Developed for sports halls, indoor soccer centers and converted tennis halls: boards, goals, nets and turf from one source, anchored to the floor or free-standing.

INDOOR
MADE IN GERMANY · DIN EN 15312

AREAS OF APPLICATION

Made for halls and facilities

The SoccerGround Indoor was developed for halls and facilities such as:

- Professional sports halls
- Indoor soccer centers
- Former tennis halls being converted
- Indoor spaces, e.g. shopping centers, trade shows
- Hotels (e.g. sports hotels, club hotels)
- Amusement parks and indoor playgrounds

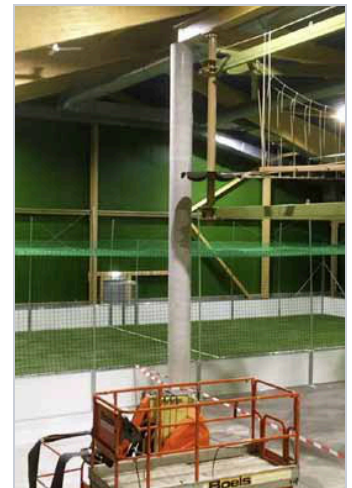

SITE REQUIREMENTS

Any hall with a level floor

The SoccerGround Indoor can be set up in any hall that offers enough ceiling height for professional soccer and a level floor (e.g. asphalt, concrete, hard court, artificial turf, wooden floor or carpet).

Ideally, the board system can be screwed or anchored to the floor. If this is not possible because the floor must not be damaged or the court is to be moved to another location later on, we also offer a suitable solution for that.

Installation is usually carried out by the SoccerGround installation team, which also takes care of special requirements (anchoring in concrete floors, attaching nets to ceilings and walls, etc.).

TECHNICAL DETAILS

Anchored or free-standing

- The SoccerGround Indoor is a ready-to-play system consisting of boards, goals and ball-stop nets behind the goals
- Ideally, the board system is screwed to the bare concrete floor via flat base plates on the outside of the court, which are then covered by the final floor covering (e.g. carpet, see pictures)
- Installation without anchoring is also possible; we will be happy to advise you on the right court system for your hall
- The profiles are made of steel (e.g. board connectors) and corrosion- and impact-resistant aluminum (e.g. handrail and goal) for lasting stability and an attractive look
- Players enter the court through 2 doors in each goal; a door can also be built into the boards on request
- High-quality ball-stop nets behind both goals, 10 ft high incl. boards, keep the ball in play; higher nets are available or recommended depending on use and hall
- Indoor courts are usually completed with side nets for a ball stop all the way around (especially recommended in halls with several courts)
- In professional sports halls, side/divider nets (higher than 10 ft depending on use) and, if needed, roof nets are recommended; these are either anchored to the system or suspended from the ceiling with tension cables
- **The boards** are double-walled with a special foam core, making them particularly high-quality and sound-insulated; are 3'3" high, with the length depending on the court size (usually approx. 16 ft); offer plenty of space on the inside and outside for your sponsor advertising (long-lasting direct print or interchangeable vinyl graphics)
- Board colors: green (RAL 6029), silver (RAL 9006), white (RAL 9010) or gray (RAL 9007); other RAL colors for boards and nets on request

COURT & GOAL SIZES

Fit to *your* hall

Like all our court systems, the SoccerGround Indoor can be sized to fit your hall. Depending on the available space, you can have several small courts for children and smaller teams, or large courts for youth, adults and larger teams. On request, the dividing boards between two courts can be made removable, so that several courts can be turned into one large one.

COURT SIZE	GOALS (H × W)
50' × 32'	6'5" × 9'8" or 3'11" × 5'11"
65' × 42' DFB STANDARD	6'5" × 9'8" or 3'11" × 5'11"
100' × 50'	6'5" × 9'8" or 3'11" × 5'11"
131' × 66'	6'5" × 9'8" or 3'11" × 5'11"
Custom	Any other size, adapted to your hall or facility; other goal sizes on request

Sizes match the court sizes in our online configurator at soccerground.com/en-US. Any other size can be built to fit your site; several courts can be combined side by side, board to board.

OPTIONAL EXTRAS

Complete the court

- Sports artificial turf** – for professional soccer conditions, filled or unfilled, for maximum, joint-friendly playing comfort
- Protective side nets** – standard 10 ft high incl. boards, higher depending on use, usually with a roof net
- Board advertising** – permanent, UV-resistant sponsor prints, either by direct print or interchangeable vinyl graphics (gloss or matte)
- Sports lighting** – with eco-friendly LED technology for optimal lighting of your hall
- Multi-sport modules** – e.g. basketball, volleyball or badminton
- Bleachers** – for a better view and more comfort for spectators
- Detailed information on request.
