THE COMPANY

SoccerGround

Creating more opportunities for sport and play is close to our hearts, and we look forward to making it happen with you as our partner. Whether it's one court, 10 or 100, every additional court means more sport and more fun for young and old.

As the exclusive manufacturer and designer of the board systems for the "1,000 DFB Mini-Pitches" project, SoccerGround specializes in permanently installed and mobile soccer and multi-sport facilities.

Through our work with the German Soccer Federation (DFB), the Brandenburg Soccer Association (FLB) and international associations, we know what really counts: safety, quality and the joy of playing, at good value for money.

Our experience comes from more than 1,400 SoccerGround board systems built to date, all of which are played on intensively and proven over many years, in Germany, across Europe and internationally. We are always happy to help with any questions.

DFB MINI-PITCHES

THE PROJECT

The 1,000 DFB Mini-Pitches Project

In 2007, the DFB (German Soccer Federation) decided it was time to actively promote soccer as a school and grassroots sport, and to use play to help integrate children and young people. Big or small, boy or girl, German-born or with roots abroad: playing together and getting to know one another was the goal, and it still is today.

More than 4,000 schools and clubs applied for the DFB grant, which covered the cost of the entire court (excluding groundwork). 1,000 mini-pitches were planned at the start, and 1,006 SoccerGround courts were built in the end, funded by the proceeds of the 2006 World Cup and UEFA subsidiaries.

Spread evenly across Germany's 21 regional soccer associations, the courts now provide coverage across the whole country, so that as many children as possible have a court nearby. All courts are fitted with high-quality Polytan artificial turf and completed by a SoccerGround board system including goals and ball-stop nets.

And it didn't stop there: following the DFB's example, the Brandenburg Soccer Association built another 84 courts, Mecklenburg-Western Pomerania 15, and many other clients more than 300 additional SoccerGround courts to date.

SoccerGround: more play and more fun in sport.

FIVE-A-SIDE

Tactics, speed and fitness

The game on the SoccerGround is fast!

Technique and quick reactions are what count here. Thanks to the boards, the ball stays in play nonstop and the players are always on the move.

That's why a game usually lasts 2×15 minutes, which has several advantages. Teams can rotate faster and don't have to wait long. Training also takes less time and is still highly effective.

For everyone who wants more than soccer, the sports offering can be tailored with the right modules: basketball, volleyball and much more. Available in many different sizes, the SoccerGround is flexible and suitable for young and old.

For children & teenagers

it is a meeting place where they get their first experience of getting the ball into the net. A place to meet up and spend free time, make new friends, let off steam and break down prejudices. Girls and boys playing together, whatever their background; the main thing is having fun as a team.

For adults

the SoccerGround offers a modern all-round training area. A chance to leave everyday stress behind and work on fitness and technique together. Ideal for work-life balance and team building, and efficient training in the shortest possible time.

THE ADVANTAGES

Special nets, no finger traps, no sharp edges

SYSTEMS PERFECTLY MATCHED TO THEIR INTENDED USE

Not every system is right for every purpose. SoccerGround board systems are designed for the conditions at hand: sturdy systems for many years of outdoor use, with or without foundations, mobile systems for events, stylish versions for indoor halls, or ultra-compact systems for very small sites.

SAFE EVEN WHEN UNSUPERVISED, THANKS TO TÜV/GS PER DIN EN 15312

SoccerGround board systems are TÜV GS-certified as a complete system (not just individual parts such as the goal), and therefore meet the standard for freely accessible multi-sport equipment. This is the basic requirement for letting children play on their own and for being able to insure the system.

MANY YEARS OF EXPERIENCE IN COURT AND FACILITY CONSTRUCTION

SoccerGround board systems have been built more than 1,400 times; all these courts have been played on intensively for years, and we keep developing them so we can always offer you the best possible system.

ROCK-SOLID CONSTRUCTION ("NOTHING RATTLES!")

SoccerGround board systems fully meet the DFB's strict requirements for child safety, noise reduction and quality, so you can enjoy your SoccerGround today and for many years to come.

NO FINGER TRAPS OR TRIP HAZARDS

SoccerGround board systems have no finger traps, sharp edges or pointed corners that could cause injuries. The feet of the mobile systems lie flat on the ground so that spectators don't trip.

HIGH-QUALITY, LONG-LASTING SPONSOR PRINTS

SoccerGround boards can be designed with UV-resistant, scratch-proof multi-color printing. So you can be sure your sponsor will still be presented prominently on your court years from now.

EXTENSIVE ACCESSORIES, ALL FROM ONE SOURCE

In addition to your SoccerGround, we can also supply the right artificial turf or playing surface, side and roof nets, board printing, floodlights, multi-sport options and much more. We also take care of installation and maintenance.

MADE IN GERMANY

SoccerGround board systems are designed and manufactured in our own steel construction company (a certified welding company) in Hennef near Cologne. We handle every production step, from development to maintenance.

BOARD SYSTEMS · DFB MINI-PITCH

SoccerGround Classic

This is the original system selected by the DFB for the nationwide "1,000 DFB Mini-Pitches" project. We developed the SoccerGround Classic based on, among other things, the DFB's strict safety requirements for schools and soccer clubs.

To ensure children can use it safely without supervision, it is designed to be particularly safe. It is also extremely sturdy, for years of playing fun. The SoccerGround Classic is firmly anchored in the ground with foundations, making it a permanently installed sports facility.

Experience from well over 1,000 installed mini-pitches shows that it is an ideal training area not only for children but also for youth and adults. Popular sizes include 50' × 32', 65' × 42', 100' × 50' and 131' × 66'. Multi-sport features such as basketball, volleyball, badminton and soccer tennis can be added.

This system is right for you if ...

- ✓ you want to set up a modern soccer or multi-sport court
- ✓ building socket foundations is no problem
- ✓ you need a system that will stay in one place for many years
- ✓ you have high demands for safety and lasting, extreme stability

SoccerGround Classic / DFB mini-pitch, 65' × 42' incl. side nets, Euskirchen

BOARD SYSTEMS · FREE-STANDING

SoccerGround Advanced

The SoccerGround Advanced is a version of the successful, proven DFB mini-pitch SoccerGround Classic. Extremely sturdy, safe and durable, and completely free-standing too! Instead of anchoring or recesses in the ground, an additional handrail provides maximum stability.

This makes it suitable for all sites where the ground can't or shouldn't be altered, such as disused synthetic surfaces or asphalt schoolyards and parking lots. This system is also a permanently installed sports facility, but it can be dismantled without leaving a trace and set up again at another location.

Of course, we also offer the SoccerGround Advanced with multi-sport options and in all sizes. Popular sizes include 50' × 32', 65' × 42' and 100' × 50'.

This system is right for you if ...

- ✓ you want to set up a modern soccer or multi-sport court
- ✓ you have a site where you don't want to or can't build foundations (e.g. synthetic surface, schoolyards, parking lots)
- ✓ you are looking for a board system for long-term installation but want to stay mobile
- ✓ you have high demands for safety and lasting, extreme stability

SoccerGround Advanced, 131' × 66', Bologna (Italy)

BOARD SYSTEMS · MULTI-SPORT

SoccerGround Multisport

Simply turn your SoccerGround Advanced or Classic into a multi-functional sports court. The modules, which can be selected separately, let you upgrade your court for other sports exactly as you need:

- **Basketball:** goals with basketball attachment, incl. hoop, backboard and net
- **Volleyball / badminton / soccer tennis:** height-adjustable net structure with tension cable and pulley, mounted on the center posts
- **Multi-functional surface:** synthetic surface with colored line markings

This system is right for you if ...

- ✓ you run a leisure facility, hotel or resort with demanding guests
- ✓ you run a school or training facility with particularly sporty children and teenagers
- ✓ you want to offer a wide range of sports, not just soccer
- ✓ you want to make your mini-pitch even more attractive and reach more customers and users

SoccerGround Multisport, 65' × 42', Leipzig

BOARD SYSTEMS · MOBILE

SoccerGround Portable

The SoccerGround Portable is the transportable mini-pitch for sports events. As a mobile soccer court with integrated goals and nets that keep the ball in play at all times, it is ready to play in no time and offers a particularly eye-catching activity area and lots of fun for young and old.

It can be set up quickly and easily anywhere, e.g. on a market square, in a park or at trade shows. Thanks to its modular design with various board lengths, larger and smaller court sizes can be built flexibly. Between uses, smaller courts can easily be transported and stored on a trailer. All boards can carry sponsor advertising. For the perfect soccer experience, combine it with our mobile SoccerTurf artificial turf. Also available with small goals for street soccer.

This system is right for you if ...

- ✓ you need a court for street parties, city festivals, public viewing, fan zones, promotions, incentive and company events, youth festivals, etc.
- ✓ you want a court that can be set up and dismantled quickly and easily
- ✓ you are looking for an activity area with plenty of space for advertising and sponsoring that really gets noticed
- ✓ you want to offer a full-fledged sports facility at your event

SoccerGround Portable, 39' x 59', Ascona, 2008 European Championship (custom build)

BOARD SYSTEMS · INDOOR

SoccerGround Indoor

Indoor soccer is booming, and particularly attractive halls draw customers. They make professional sport possible regardless of the time of day or year. Equip your new soccer hall or former tennis hall with SoccerGround boards, goals, nets, floodlights and SoccerTurf artificial turf, all from one source.

Depending on the space available, several courts can be lined up side by side and separated by nets suspended from the ceiling. The aluminum and steel structure is securely and invisibly fixed to the floor under the indoor turf. Alternatively, separate courts that are not screwed to the floor can be moved temporarily. Any court size can be built, whether large (e.g. 131' × 66') or small (e.g. 50' × 32').

This system is right for you if ...

- ✓ you want to equip a new soccer hall or former sports hall with modern soccer or multi-sport courts
- ✓ you want to make your hall more profitable
- ✓ you place great value on sound-insulated, extremely robust and long-lasting boards, high-quality artificial turf and professional floodlights

SoccerGround Indoor, 131' × 66', Nürburgring ring°arena (event)

BOARD SYSTEMS · COMPACT

SoccerGround Cage

Bring pace to your event with the SoccerGround Cage, our compact soccer cage that packs a punch. Roughly 16 ft in diameter, with original DFB mini-pitch boards and two mini goals, and, like all our SoccerGrounds, ultra-robust. It has to be, because inside, the soccer action really takes off!

1 vs. 1, fast and furious but fair. Whoever scores 5 points first, or knocks out the opponent with a panna (nutmeg), wins the match. The ideal training and fun tool for events, promotions, youth or company events and much more. It needs little space but delivers all the more fun and action for players and spectators. For perfect grip, we recommend our professional soccer artificial turf.

Two versions: the **Cage Mobile**, a steel and aluminum system with a surrounding ball-stop net and foldable goals, quick to set up and transported by trailer, for events and temporary use; and the **Cage Antivandal**, all steel with a twin-wire mesh ball stop and a lockable door, for permanent outdoor installation.

This system is right for you if ...

- ✓ you need a court for street parties, city festivals, public viewing, fan zones, promotions, incentive and company events, youth festivals, etc.
- ✓ you want a court that can be set up and dismantled quickly and easily, or a lockable cage for a public space
- ✓ you only have a small activity area available and want to make the most of it
- ✓ you are looking for a very compact tool for lots of fun, action and attention that is easy to transport and store

SoccerGround Cage Mobile, 16 ft diameter

ACCESSORIES

SoccerNet side and roof nets

- In addition to the nets behind and in the goals (already included), we offer side and roof net structures (side net height e.g. 10–13 ft as standard, 16 ft safety net)
- The sides use the same high-quality, safe brand-name nets as the goal ends; with a mesh of 2" × 2" and 5/32" cord, they can't be climbed and don't cut into fingers
- They keep the ball in play at all times and ensure a smooth game without unnecessary interruptions, and prevent balls from disrupting nearby roads
- Outside opening hours, the court can be locked by bolting the doors
- The side nets are available in different colors; the roof net is usually black and hardly noticeable thanks to its wider 4" × 4" mesh
- It is tensioned with a cable structure instead of a solid roof structure that could loosen and fall down over the years
- The entire structure is protected against corrosion by hot-dip galvanizing per DIN EN 1461

Board advertising

- Use the board design to showcase your sponsors; working with sponsors can partially or fully refinance your court
- The board panels offer extensive advertising space on the inside and outside
- Particularly suitable for sponsored courts, company mini-pitches, incentive events and more
- **Direct print:** long-lasting, UV-resistant multi-color offset print applied directly to the boards
- **Vinyl graphics:** temporary, interchangeable multi-color vinyl graphics (e.g. when sponsors change)

ACCESSORIES

Multi-sport options

To extend your sports offering, reach a wider audience and make your facility more attractive, you can upgrade your SoccerGround to suit your needs. The following modules are available:

- **Volleyball, badminton & soccer tennis:** height-adjustable net structure with tension cable and pulley, mounted on the center posts; the net can be set for the sport you want to play
- **Basketball:** goals with basketball attachment, hoop incl. backboard and net

Sports surfaces

On request, we can supply the right playing surface with white or colored line markings. Our brand-name sports surfaces are available in different versions and price ranges:

- **Artificial turf:** for soccer and extra playing comfort, unfilled or filled with sand and rubber granules, incl. elastic underlay for optimal shock absorption
- **Synthetic surface:** for the best ball bounce in basketball
- **Multi-functional artificial turf:** with more ball bounce for multi-sport

The SoccerGround also works with **asphalt** (schoolyards, parking lots) and **natural grass** (parks, events).

ACCESSORIES

SoccerLight floodlights

- **SoccerLight LED energy-saving system:** maximum service life with minimal energy and maintenance costs; up to 40% energy savings, up to 100,000 operating hours, dimmable on request
- For play at any time of day, an impressive experience for spectators and a real stadium atmosphere late into the evening
- The floodlight system can be mounted without additional foundations
- Depending on the court size, 2, 4 or 6 masts are used per SoccerGround
- Individual lighting levels, e.g. in accordance with DIN EN 12193 class 2 or 3
- We will be happy to prepare a lighting calculation for your court

SoccerGrandstand bleachers

- Create a real stadium atmosphere with spectator stands featuring FIFA/UEFA-compliant stadium bucket seats for the best view
- Two or three tiers, with 20/30 seats per 16 ft segment (i.e. 80/120 seats along a 65 ft court)
- TÜV-tested stands that need no foundations thanks to special counterweights, so they stay mobile
- Optimal staggered seating rows, with even the first row raised, so every row has the best view of the court
- The handrail gives spectators something to lean on and stops overexcited fans from falling onto the row below
- The back of the stands can be fully covered with advertising banners
- Quick and easy installation as a modular system; seats available in various RAL colors

Small space.
Big game.
