

SOCCERGROUND MINI-PITCH · MULTISPORT

One court. Every sport.

Soccer, basketball, volleyball, badminton, soccer tennis and handball on one surface: the proven SoccerGround board system with the sports modules of your choice.

MULTISPORT
MADE IN GERMANY · DIN EN 15312

THE ALL-ROUND SPORTS FACILITY

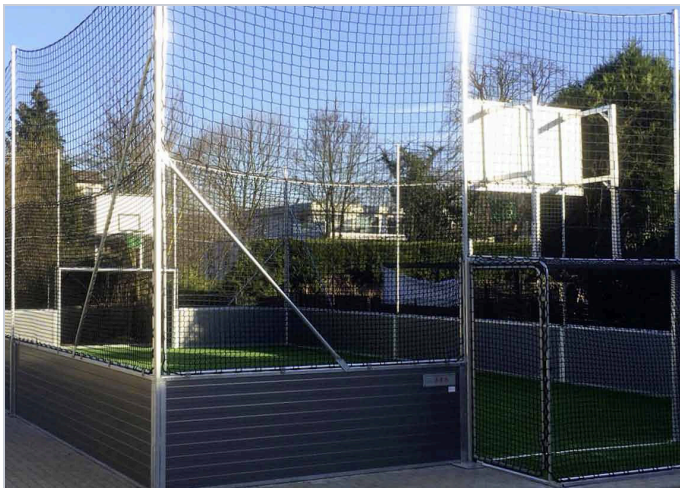

A meeting place for every generation

The SoccerGround Multisport is always the perfect choice when several sports are to be offered on one and the same surface. The multi-sport arena gives everyone who loves sports and games a valuable addition to their everyday environment.

Basketball and volleyball pros, amateur athletes, girls and boys, young and old: this is a meeting place across generations and among peers. The ideal place for local club leagues and recreational games.

Goals with basketball hoops and a height-adjustable net system offer a wide range of options:

- Soccer
- Basketball
- Volleyball
- Badminton
- Soccer tennis
- Handball

AREAS OF APPLICATION

Something for everyone

Our all-round sports court is suitable for a wide variety of locations, as it meets different needs and has something to offer everyone. We particularly recommend the SoccerGround Multisport for:

- Municipalities
- Schools, sports academies and boarding schools
- Sports clubs and associations
- Club hotels and resorts
- Companies with employee sports programs
- Amusement parks and public pools
- Parks and playgrounds
- Community centers and social institutions

SITE REQUIREMENTS

Anchored or free-standing

The SoccerGround Multisport combines the proven SoccerGround board system with the sports modules of your choice (basketball and/or a center net system) and a multi-sport artificial turf or synthetic surface.

Depending on the equipment and the ground conditions at the site, the board system is anchored in the ground with socket or screw foundations. A largely free-standing installation is also possible.

Each playing surface places certain requirements on the sub-base. For artificial turf and smaller synthetic surfaces, a level, unbound base layer (gravel) is sufficient. Larger synthetic surfaces usually require a bound base layer (permeable asphalt).

Just tell us about the planned location (e.g. a lawn, schoolyard or existing sports ground) and your ideas, and we will be happy to advise you.

THE BOARD SYSTEM

Technical details

- The complete, ready-to-play basic system consists of surrounding boards, 2 goals and ball-stop nets at the goal ends, where most shots land
- Basketball equipment and/or a center net system can be added on request
- The entire structure is extremely sturdy, structurally certified, long-lasting and virtually maintenance-free
- Hot-dip galvanizing makes all steel components permanently weatherproof and corrosion-resistant, and therefore much more robust than comparable systems made of, e.g., aluminum
- The boards are 3'3" high and made of double-walled, metal-coated sandwich panels with a special sound-absorbing foam core for optimal noise reduction
- Board colors: green (RAL 6029), silver (RAL 9006), white (RAL 9010) or gray (RAL 9007); other RAL colors for boards and nets on request
- The goals, including goal nets, are integrated into the steel structure and allow access for cleaning vehicles
- Players enter the court through doors in the goals, which are TÜV-approved as emergency exits
- An entrance door can be integrated into the boards on request
- High-quality ball-stop nets behind both goals, 13 ft high including boards (16 ft on request), keep the ball from flying over the target. With a mesh of approx. 2" × 2" and 5/32" thick cord, children cannot climb them and they won't cut into fingers
- The nets are evenly tensioned by stainless steel tensioning systems and neatly threaded onto a round tube directly at the edge of the boards
- Add a roof net to keep the ball on the court at all times
- No finger traps, no sharp edges and no protruding corners
- TÜV GS-tested as a complete system and compliant with DIN EN 15312 (freely accessible multi-sport equipment), so the court does not need constant supervision

THE MULTI-SPORT MODULES

Basketball equipment

The highly weather-resistant, hot-dip galvanized basketball structure is mounted above the goals and fitted with a backboard, basketball hoop and vandal-resistant nets. For extra safety, the hoop is designed to fold down, with a reliable shock-absorber return mechanism. Compliant with DIN EN 15312 for freely accessible multi-sport equipment.

Height-adjustable net system

The net system is mounted on the center posts of the long-side boards. Game posts with net, continuously adjustable in height from 4'3" to 7'10", allow a wide range of sports, including volleyball, badminton and soccer tennis. In accordance with DIN EN 1271, the net is usually 31 ft long and 3'3" high and comes with a tension cable. The mesh size is 4".

THE PLAYING SURFACES

Synthetic surface

Ideal for all courts where soccer, basketball, volleyball and other sports are to be played on an equal footing.

The synthetic surface provides a smooth, non-slip finish and therefore the best conditions for multi-sport courts that need good ball roll as well as good ball bounce.

As the surface dries quickly, it can be used all year round as an all-weather court. Other advantages are its high wear resistance and low maintenance.

Artificial turf with sand infill

A good choice if the focus is on soccer and on sports that don't require much ball bounce.

Thanks to its ideal ball roll (not too fast, not too slow), it provides the perfect base for soccer, and its soft, cushioned surface is also easy on the joints and helps prevent injuries.

For multi-sport courts, we recommend artificial turf with a built-in elastic base layer; we will be happy to advise you.

COURT & GOAL SIZES

Sized to *your* site

The size of the SoccerGround Multisport can be chosen freely, depending on the available space, the target group (children, youth or adults) and the sport. Courts can be combined so that games and training run side by side, board to board.

COURT SIZE		GOALS (H × W)
50' × 32'		6'5" × 9'8"
65' × 42'	DFB STANDARD	6'5" × 9'8"
100' × 50'		6'5" × 9'8" or 6'5" × 13'1"
131' × 66'		6'5" × 16'5"

Sizes match the court sizes in our online configurator at soccerground.com/en-US. Any other size can be built to fit your site; several courts can be combined side by side, board to board.

OTHER EXTRAS

Complete the court

Protective side nets – in various heights (standard 10 ft incl. boards, 13 ft or 16 ft safety nets)

Roof net – for complete protection against lost balls; combined with a roof net, the side nets on multi-sport courts should be 16 ft high

Sponsor branding – by direct print or vinyl graphics, for commercial use as part of sponsorship activities, ideal for refinancing

Professional floodlights – turn your court into a complete stadium, keep it playable into the evening and, for commercial use, make it more profitable

SoccerGround Multisport, Dörentrup, 65' × 42'

Small space.
Big game.
